

# Building a better document solution

with the TA Triumph-Adler CivEngPack

## The foundation of a complete solution starts with the CivEngPack

The CivEngPack is focused on a scalable platform to adjust to the needs of any building or civil engineering company. Based on industry leading software components, a solution can be tailored to any configuration from large projects to building a shed!

## Mobile working and Project Cost Control with the CivEngPack

Picture the scene, you go from site to site, you open new sites, you scale sites down as the build nears completion, during all this you need a reliable printing and scanning solution. Enter the TA Triumph-Adler CivEngPack! A suite of products designed to move in line with your business. Mobile printing, project billing management, 'Pull Printing' AND scanning!

## Robust hardware and Secure software

If you have staff that move from site to site, have Wide Format plotters, or Quantity Surveyors that need to scan anywhere, the CivEngPack offers multifunctionality by incorporating hardware, software and professional services in a way that ensure these requirements are met. Even if you run a dual network it's not a problem, our solutions work with our hardware and can have two separate network cards fitted.

### Project Billing and cost control

- ✱ Secure and 'Pull Printing' multi-site printing.
- ✱ Mobile printing across all platforms.
- ✱ Single print driver for easy IT implementation.
- ✱ Wide format printer support for reporting.
- ✱ SAP printing support.
- ✱ Cloud Scanning and Printing.

### Advanced networking

- ✱ Only users that are given access can print and scan using the software included in the CivEngPack. Pin Codes / Swipe Card / login information are options with a second level PIN if required.

### Scanning and Document Management

- ✱ Secure 'Pull Printing' Scanning.
- ✱ Barcode scanning and printing.
- ✱ Scanning can be directed to nominated systems, folders or by email to set addresses only.
- ✱ Data security at the device can be controlled with EAL3 level data overwrite.
- ✱ Security watermarks can be added for printing and copying.
- ✱ Optical Character Recognition.
- ✱ Digital job sign off features.
- ✱ Cloud / datacentre integration.
